Oroville Dam Auxiliary Spillway Incident

On 05/14/17 at 1624 hours, the California State Warning Center (CSWC) was advised by the Department of Water Resources (DWR) that they will reduce flow to the Feather River on 05/15/17 at 0900 hours.

- Total flow to the Feather River will decrease from 26,000 cfs to 23,500 cfs.
- Hyatt Powerplant outflow will remain at 5,000 cfs.
- The Oroville Dam Flood Control Spillway flow will be reduced from 25,000 cfs to 22,500 cfs.
- These changes are necessary to manage Lake Oroville's water surface elevation and to safely close the Flood Control Spillway.
- DWR anticipates additional flow reductions this week and will send notifications as these operational changes are finalized.

Per the DWR Flood Operations Center and California Data Exchange Center (CDEC) [as of 05/16/17 at 0900 hours](#):

- Inflow: [2,828](#) cfs.
- Outflow: [25,080](#) cfs.
- The current lake elevation is [835.93](#) feet.

Norovirus/Gastrointestinal Outbreak, Yolo and Sacramento Counties

Yolo County has had a recent Norovirus/Gastrointestinal Outbreak that is affecting numerous schools in the county.

- 42 schools have been affected.
- 1,598 students, teachers, and staff are ill with stomach cramps, vomiting, and/or diarrhea in schools throughout Yolo County.
- Yolo County Health and Human Services is working with California Department of Public Health (CDPH) and the California Department of Pesticide Regulation (CDPR) regarding the concerns schools have using Bleach.
- Yolo County Health and Human Services will continue to work with Yolo County Office of Education to stop the spread.

On 05/15/17 CDPH provided the California State Warning Center (CSWC) with an update stating since 05/04/14, there have been reported outbreaks in schools in Sacramento County affecting students and staff. As of 05/12/17, the following as been reported:

- 19 public and private schools have reported these outbreaks.
- 1 specimen from an affected individual tested positive for Norovirus in the Sacramento Public Health Lab.

The California State Warning Center (CSWC) and California Department of Public Health (CDPH) continue to monitor the situation and will provide updates as they are received.

SITUATION SUMMARY

2017 February Storms

Cal OES Coastal Region

Pfeiffer Bridge Incident, Monterey County

California Highway Patrol (CHP) and Caltrans had a hard closure on the Pfeiffer Bridge on HWY 1 at mile marker 45.52 (SB Sycamore Canyon and the Bridge) due to a crack in the bridge. The bridge has been demolished so the road is closed and estimates for some access from the north is late September 2017.

- Backup air medical transport plans have been developed for medical emergencies through Cal OES Law Enforcement Branch.
- All businesses north of the Pfeiffer Canyon Bridge closure are open to the public.

Per the Cal OES Coastal Duty Officer (CDO), as of 05/16/17, full closures of Nacimiento-Fergusson Road are set to begin on 05/18/17 at 0800 hours. Motorists wishing to travel westbound should do so before the Caltrans bridge supply convoy delivering construction equipment and materials begins. Motorists wishing to travel eastbound towards US Highway 101 will be held at State Route 1 until the convoy passes.

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

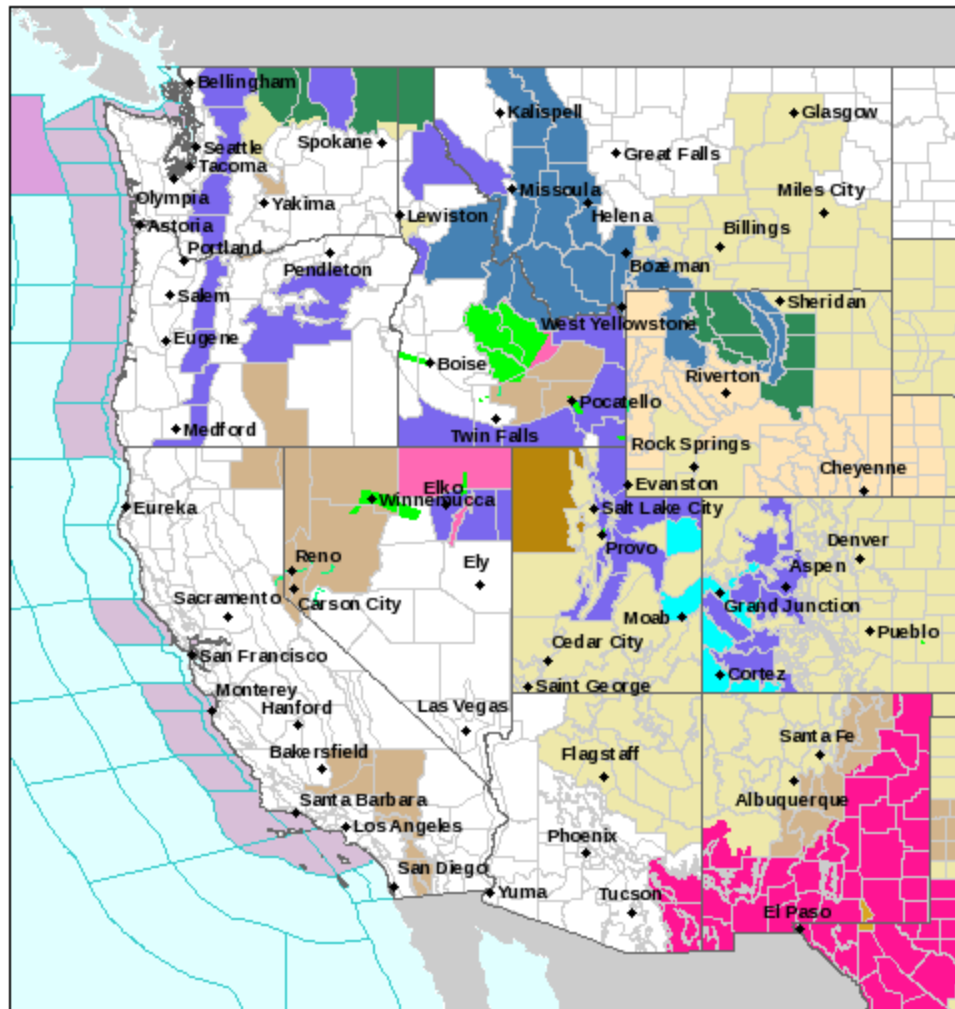

Low pressure over Washington State today will move to southern Idaho tonight. This weather system will bring cooler temperatures, cloudiness and some precipitation to Northern California through tonight, and a few isolated showers or thunderstorms are possible in the eastern mountains again on Wednesday. Strong high pressure will begin returning to the region by late Wednesday and will continue to dominate the weather pattern for later this week through the weekend. We will see our warmest inland areas go from the mid and upper 60s today to the mid 90s for the weekend. S to W winds will gust to 25-35 mph in many areas today, and the most wind-prone mountain locations may see gusts of 50 mph. On Wednesday northwest winds will gust to 15-25 mph, with a few locations seeing gusts of 35 mph. Northwest-North winds Thursday and Friday will be nearly as strong. High pressure will remain over the area during the weekend, but the atmosphere will be a bit less stable as a low pressure trough passes to our Northeast. This could lead to isolated afternoon thunderstorms in the mountains both days.

SOUTHERN CALIFORNIA

Cool and locally breezy weather will continue today and Wednesday as an unseasonably deep trough heads slowly eastward. Yesterday, some light shower activity resulted in 0.10 – 0.20" of rainfall across the front side of the Angeles National Forest and across inland San Diego County. While some patchy drizzle may occur through the morning hours, no additional precipitation is expected through the period. Widespread stratus will cover many areas outside the desert this morning and only partial afternoon clearing is likely across inland valley areas and the southern half of the San Joaquin Valley. Temperatures the next two days will be 5-15 degrees below normal with readings in the 60s and lower 70s at lower elevations. Northwest winds of 15-25 mph with gusts to 35 mph will be possible in and near the Antelope Valley today. Expect winds to increase slightly Wednesday with some gusts to 45 mph possible in the Kern County Mountains and the Banning Pass by afternoon. Later this week, high pressure will rebuild over the area, leading to much warmer temperatures. Highs Thursday will likely jump 8-12° across inland areas with far less marine layer cloudiness in the morning. Local north winds of 15-25 mph will be possible Thursday and Friday nights across Santa Barbara County and the I-5 Corridor. Some light offshore flow with wind speeds under 25 mph will be possible this weekend. By Saturday and Sunday, expect highs to reach the lower to mid 90s in the valleys with low desert readings back over 105°. Winds will be light over all areas by Sunday morning. Minimum relative humidity will dip into the 10-15% range for 6-8 hours Saturday through Monday. A weak trough may bring a slight amount of cooling to coastal areas early next week.
